Introduction

Tron Googol has been conceptualized & created to address the GAP for making everyone truly financially successful in the networking business. Extensive observation, researches & study from pool of matrixes & passive income algorithm & modules from the past in the networking space has been made to assure that all the participants can address financial goals in short to long term by applying minimum effort with Tron Googol .

Tron Googol Concept

A googol is a very large number. In decimal notation, it is written as the digit 1 followed by one hundred zeroes. The term was coined in 1920 by 9-year-old Milton Sirotta (1911–1981), nephew of U.S. mathematician Edward Kasner. Kasner popularized the concept in his 1940 book 'Mathematics and the Imagination' to give a sense of how big a googol really is. With Tron Googol you can earn over and over again. It is upon you to decide how big an amount you want to earn.

History of Giving

ASIAN CULTURE

Members of a family will put in money to contribute to one family getting a business. All members will work at that one family's business until enough wealth is generated to open the next family's business.

JAMAICAN CULTURE

Individuals come together by giving designated person a certain amount of money on a weekly basis and at the end of the year that you have contributed is returned in totality. There is no additional profit is made on the contribution.

HISPANIC CULTURE

Families contribute a weekly set amount to a certain family for a set period of time. Once the time is fulfilled, each family continues to contribute and the next family collects. There is also no profit made on this contribution.
